

Is your partner suffering from  
an untreatable terminal disease?

We can pay out your life  
insurance policy in advance

When you or your partner is suddenly confronted with devastating news of an untreatable terminal disease your life will change immediately. After the initial shock you may need to research further treatment or just decide to enjoy the rest of your days together in the most comfortable manner possible. Your cost of living will rise; however, your interest in financial matters will dwindle. As long you have financial resources there is no problem.

But if your financial resources are limited, you could face additional problems. It seems time is running out more fast after you receive that news from your doctor.

Moreover, you might have some wishes and you still want to fulfil those wishes. A journey around the world, a visit to another medical doctor (even abroad) for a second opinion. But these costs are not covered by your health insurance!

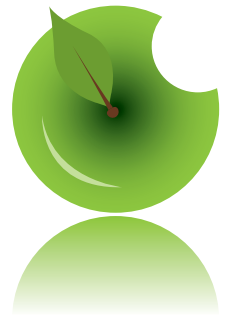

If you already own a life insurance policy, VZG can be at your service.

We can pay out your life insurance prior to your death. This enables you to benefit from the policy in advance. We can also make advance pay-outs on insurance policies combined with a mortgage. We are in contact with every insurance company located in the Netherlands, under supervision of the Insurance Association.

### **Simplicity**

Only a short interview is sufficient to start the payment of a lump sum in advance. Therefore, no lengthy lasting interview with insurance company-related doctors or with an intermediary linked to the insurance company is required.

Just complete the VZG application form and submit the terminal statement from your medical doctor, a copy of your policy and a copy of your passport or ID-card. One of our employees will collect the documents and pass them on to a notary who will keep them in custody.

### **Information**
